

**Smart Home - Complete Kit CK17-USB**

All you need in one kit. Including comprehensive remote control, also suitable for all you audio and video equipment. Including PC interface and Windows software: Program everything on your PC. Burglar prevention: Create a lived-in look during absence.

**Contents**

**Computer Interface CM11-USB**

Program your entire Smart Home System on your computer. The computer can then be switched off; the settings are saved in the CM11. Connection to the USB port of your PC.

**Bayonet or Screw-in Lamp Socket LM15**

It couldn't be easier: Place the socket into the lamp and then the bulb in to the socket. Done!

**Appliance Module AM12**

Switch all your appliances on or off: coffee machine, audio/video equipment, washing machine (off-peak period), etc.

**Lamp Module (2x) LM12**

Switch and dim your lights to any desired setting (max. 300 Watt).

**Transceiver TM13**

Transmit the commands for your remote control via the mains. Also operates as an appliance module.

**EasyControl 8 Remote Control**

Control your entire system with one remote control, even through walls and ceilings. Also suitable for use as a universal remote control for all your audio and video equipment. Pre-programmed for all common brands and models. Contains a programmable Macro button to e.g. dim the lights, tune the TV to the right channel, start the DVD player and activate your Home Cinema System with one press of a button.

**Home Control Kit - Starter Kit LK15**

Starter kit with three basic elements. Easy and unlimited expansion possibilities. Including compact key chain remote control.

**Contents**

**Transceiver TM13**

It couldn't be easier: Place the socket into the lamp and then the bulb in to the socket. Done! (Max. 100 Watt)

**Remote Control KR22**

Compact key chain remote control, for 4 randomly chosen modules.

# SMART HOME

create the house of the future now

**Control all your appliances and lights without leaving your chair.**  
**Easy to program via your computer.**  
**Unlimited expansion possibilities.**

### Feel safe

- Simulate presence during absence.
- Switch all the lights on with the press of a button when there is a suspect sound.

**Marmitek Home Control makes your life more pleasant and comfortable, saves electricity and gives you extra security, whether you are in the house or not. For some, Home Control means being able to control the lighting with the same remote control as is used for the TV, for others Home Control is a fully computerized system that adjusts itself to their life style. Marmitek offers you plenty of choice.**

### Program everything when you want to

- The software calculates when it gets dark, taking daylight savings time into account.
- Switch the lighting 'randomly' at night, to make it look as if you are at home.

### With one press of a button...

- Dim and switch your lights and appliances.
- Create the perfect atmosphere for a dinner party, watching a movie, etc.
- Switch all the lights on or off when leaving, coming home and going to bed

### Create "the house of the future" now!

Comprehensive applications via your PC, such as lived-in look during holiday.

Use one remote control to switch and dim lights, electric appliances, water fountains, audio and video equipment, etc.

Use the ultra-thin designer switches to create switch points in places without wiring (also on glass doors, moving elements, etc.).

No extra wiring: the X10 signals are transmitted via the mains.

### No need to go out...

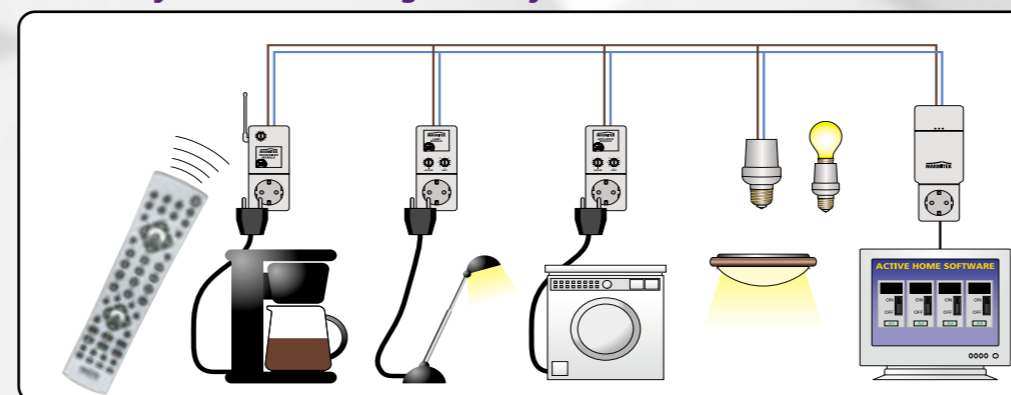

- Switch on outdoor appliances and lights from your living room. No need for extra wiring: all signals are transmitted via the mains to e.g. garden lighting, fountain, swimmingpool, garden shed, etc.

### Use the phone...

- Control your lights, heating and appliances by phone, wherever you are.
- Being warned when the burglar alarm is activated (SC9000).

### Create a system that is designed for your needs!

### Easy living

- Switch off all appliances or lights with one press of a button when you go to sleep or leave the house.
- Wake up to the smell of fresh coffee: The coffee machine will start automatically.

**Lamp Module LM12**  
Switch and dim your lights.

**Appliance Module AM12**  
Switch any appliance on or off.

**MicroModules**  
Make your system totally invisible: Build the modules into existing switches or sockets.

**Wireless Switch SS13**  
Flat designer switch, can be attached everywhere.

**In-Wall Switch, Dimmer, Shade Shutter Switch**  
In-wall switch with built-in X10 functionality.  
AW10 Switch  
LW11 Dimmer  
SW10 Shade Shutter Switch

**Motion Detector MS13**  
Motion controlled activation of lamps and appliances. Built-in dusk and dawn detection.

**PC Interface CM11-USB**  
Program your entire system via the PC. The PC can then be switched off.

**Din Rail modules**  
Integrate the X-10 System in your distribution panel.

**Remote controls**  
Available in several types and sizes.

**Maxi Controller/Security Consol SC9000**  
Complete wireless security system with dial-in and dial-out. Transmit commands to the system by phone to e.g. switch on lights.
