

GIGAVIDEO[®]

wireless sound and vision through walls
and ceilings

Watch DVD images in bed from the player downstairs.

Suitable for your DVD player, video recorder, satellite receiver, PC, etc.

Control your equipment through walls and ceilings using your own remote control.

MARMITEK[®]

GIGAVIDEO 45

- Video transmitter set with infrared return feature.
- Wireless transmission of images and sound, e.g. of your DVD player, VCR, PC, DVB-T receiver and satellite receiver.
- Suitable for every brand and model.
- Watch TV in any room or in the garden: the signal travels through walls and ceilings!
- You can control the equipment connected (e.g. the DVD player) while watching TV.
- Perfect images and stereo sound.
- Easy to install.

The smallest!

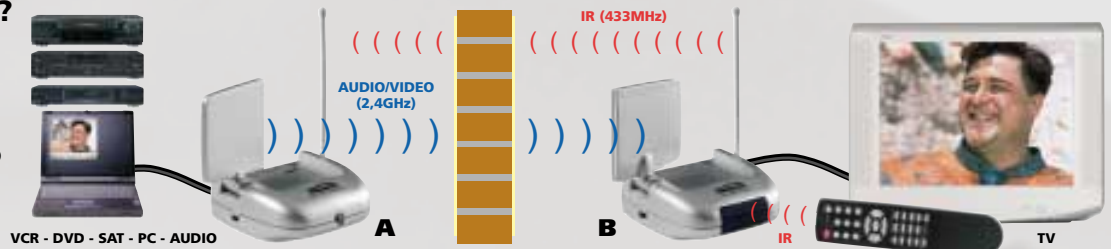

GIGAVIDEO 70

- 'Professional' version of the GigaVideo 45 in a beautiful and compact 'silverline' housing.
- Equipped with a modulator, which makes it suitable for TVs without a Scart connection.
- Including 'scart doubler' to retain a free Scart connection after connecting the transmitter.
- Made ready for use with the Smart Scart Box.
- Including a set of additional connectors.

HOW DOES IT WORK?

It's very easy. The set consists of a transmitter and a receiver. Using these you can transmit audio and video wirelessly, through walls and ceilings. You connect your VCR, satellite receiver, decoder, DVD or PC to the GigaVideo transmitter (A). Then you connect the receiver (B) to a TV. You can also control all equipment, connected to the transmitter, with your own remote control.
